But no need to fear.
Might feel nervous at the door,
But the joy would take over,.
When we see our friends once more.**

Life during pandemic was difficult for parents and students alike. The return to school an important and welcome step. Till March 2020 , our school life went as normal and crazy as it was until the pandemic hit . March 2020, the point of time when the students had just bid off the academic year 2019-20 and were frenzy with excitement along with their friends for the next academic year. Fast forward to the first day of offline school....

**Routines changed,
When all got caged
Teaching and learning
changed,
When books with
gadgets
got exchanged..**

Students being excited to see their school, meet their friends whom they missed a lot and also interact with their teachers who had been very supportive and encouraging from the

beginning specifically during pandemic.

After all, it's almost been months since they are back to their normal school life after pandemic.

Getting back to school and being with school friends has made it better. The school started with first vaccinating the students and strict guidelines imposed keeping in mind the health and hygiene of everyone.
