## School Newsletter : 2019-20 : II

*From Principal's Desk*

*Editorial*

Greetings from New Horizon Public School. The world has not faced a pandemic like COVID 19 ever before. The entire world is in lockdown and quarantine. It has been and will be a great change maker bringing in unprecedented transformation. Some of the changes are quite visible.

Many are working from home and many schools are conducting classes online and many others are trying to engage their students through one or the other activity. We have been trying to keep our students engaged during this lockdown in meaningful activities.

Teachers have been conducting online classes, sharing study material like worksheets, skillsheets, PPTs, teaching video repository, sharing students' edition of newspapers, activities, reading material, books, etc. School has been issuing detailed guidelines at regular intervals for students for planning their time throughout the day.

COVID 19 pandemic and lockdown has created many challenges for all of us. Let not these challenges make us pessimistic rather help us to discover our strengths and overcome our weaknesses. All students must use this precious time for studying, reading, discovering the hidden talents, meditating, helping your parents in household chores, etc. I appreciate the work done by the entire Editorial Team for making this Newsletter vibrant and creative. God bless you all.

Dr. Nicholas Correa  
Executive Director & Principal

Our daily life in Maharashtra and India for the past month is eerily quiet. This is because we have heeded the government admonishment to stay home and prevent the transmission of coronavirus that has caused a global pandemic. Suddenly all our vacation plans and career plans seem to be derailed. Humanity in its march to prosperity seem to have met a temporary obstacle in Corona Virus. As we take a pause from the hustle bustle of work and, stress we may feel that our world has fallen apart and it is turned upside down.

In the new context of quarantine, where we have limited physical contact in the physical world; the virtual world is the new paradigm of reality. Suddenly individuals and corporates from various sectors are looking to the internet (virtual world) as a source of entertainment and as an alternative till resumption of normal life. A new form of society is being evolved, one not constrained by geographical limitations, limitations of language. In this new World, Technology is the criteria between the haves and have nots. A person who is techno savvy and is conversant with a smart phone and has a high speed internet is better placed than others. Students are more exposed and conversant with the internet and virtual world. We can make better use of this unique time, to enjoy the world of e-books. There are sites where one can read classics or hear them. We can use this time creatively by enjoying new genre music or applied arts and fine arts.

I suppose in a strange sort of way, the rapid spread of corona is an indication that world has become a global village, where even a virus could spread across continents and become a pandemic and bring life to a complete stand still. As most of us are isolated in our homes, let us take some time to enjoy the beauty of the life.

As W.H Davies says

What is the life of full of care?

No time to stand beneath the boughs

We have no time to stand and stare

No time to stand beneath the boughs So let us utilize the time to understand and experience the glorious uncertainties and beauty of life.

Mrs Annie Kurien
